SUMMARY

Motivated front-end/full-stack developer and UX/UI specialist with a unique background in software development (graduated with a 10/10), automation and entrepreneurship. I combine strong code quality with user-centered design and strategic use of AI. I translate user needs into clear user stories and requirements, and then turn these into intuitive designs within the defined design language. With my technical expertise, I bring these designs to life.

EXPERIENCE

SoundCheckd | www.soundcheckd.app / App Store
Founder - CTO *Juli 2026 - Present*

- Designed and built a central API (Symfony, Docker) that securely and efficiently provides data to both the iOS app and web application.
- Designed and developed an advanced internal web application (Next.js, TypeScript) for managing users, content, and third-party integrations.
- Developed and launched a native iOS app (Swift, SwiftUI), including App Store release management, with 20+ downloads.
- Built an optimized public-facing promotional website (Next.js) focused on maximum performance, SEO, and conversion.

Louvels.dev
Full stack developer *Juni 2025 - Present*

- Develop custom software solutions for SMEs within an agile Kanban team using Next.js, TypeScript, Symfony, Docker, and Azure DevOps.
- Implement AI to optimize business processes and workflows using Large Language Models (LLMs), prompt engineering, and AI APIs.
- Designed and developed an Excel validation tool using Next.js and Symfony for FiDocs, accelerating the internal validation process by 110%.
- Optimized a logistics process at Van der Haas by 20% through a real-time dashboard with automated PDF integrations using Symfony.

Outlier.ai
Dutch Language Expert *Januari 2025 - Juni 2025*

- Improved Large Language Models (LLMs) for the Dutch language by ensuring grammatical accuracy and cultural relevance throughout the prompt engineering process and providing feedback on model responses.

Jem-id
Front end development stagiair *September 2024 - Februari 2025*

- Designed and developed a user-friendly customer information dashboard (Figma, React, and TypeScript) while collaborating within an agile Scrum environment.
